This is a self-assessment of the CSIR SANReN Competency Area's compliance with the REFEDS Security Incident Response Trust Framework for Federated Identity (Sirtfi) version 1.01. Such an assessment is necessary because the Federation uses a hub-and-spoke architecture, and thus some Federation components are in scope for identity- and service- providers own Sirtfi assessments. For this reason, SAFIRE's own assessment includes more detail than it normally requires of Federation Participants (who need only provide the expression of compliance).

21 September 2017

Mr. G Halse
The SAFIRE Project Director
Tertiary Education and Research Network of South Africa (TENET)

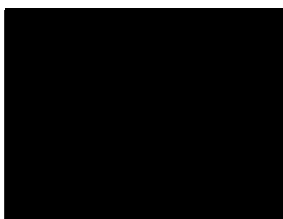

Re: Expression of Sirtfi compliance for the CSIR-SANReN Identity Provider

This serves to certify that the SANReN Competency area of the Council of Scientific and Industrial Research (CSIR) completed a self-assessment of the SANReN Competency Area's identity provider on the 11 September 2017. The SANReN Competency Area, of the CSIR, hereby confirms that at the time of assessment it satisfied the aforementioned normative assertions set out in the REFEDS Security Incident Response Trust Framework for Federated Identity (Sirtfi) v1.0.

This expression of compliance is scoped to the following SAML entities:
